

327-N

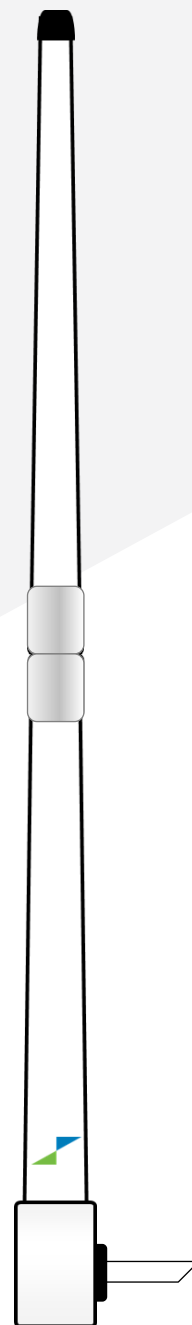

The all new Shakespeare 327-N antenna is designed to help with the all round logistics of shipping antennas.

Designed to the same high standard as the industry popular 427-N within our Classic Range, the 327-N is manufactured in two parts and assembled on the vessel. This allows the unit to be shipped under 0.9m long and therefore at a much lower cost and less environmental impact

- High Impact Nylon ferrule antenna based on the 427-N design
- Bayonet lock system on joint to ensure rigidity
- Supplied with 6m cable and plug as standard
- Designed to work with all VHF radio systems
