SHAKESPEARE 4018 VHF Marine Antenna

(5.8m) VHF Marine Band 9dB Gain

Phased 1/2-wave elements in a collinear array with a coaxial choking sleeve to suppress cable radiation

The top choice for charter boat captains and experienced sport fishing enthusiasts. This long-distance VHF antenna is rigid enough to stay erect in rough seas, yet exceptionally lightweight. The 4018 has an chrome plated ferrules for long lasting performance. It is used primarily for land-based stations and on commercial vessels.
