SHAKESPEARE 5225-XP
VHF Marine Galaxy Antenna—Extended Performance

(2.4m) VHF Marine Band 6dB Gain

Shakespeare's Improved Best – The 5225-XP maximizes range and quality in a great looking antenna. The 5225-XP is Shakespeare's Galaxy® antenna in a stronger, stiffer radome. It's extra tough for use on hard tops, T-tops, radar arches, or wherever its extra resistance to high winds and high speeds is welcome. Also the element is SILVER PLATED—Silver is an improved conductor and is less affected by oxidation over time—making the antenna a constant improved performer
